PROJECT DESCRIPTION

The 3L Mindset project aims at provoking a positive shift in the mindset of lower-skilled adult immigrants with regard to adult education. We want to lower the barriers for this target group for participation in education by tackling the situation from both sides; the educational institutions and the teachers on one end and the actual lower-skilled immigrant adult on the other. Ultimately we want to foster both successful up-skilling of the target group and higher levels of social inclusion.

PROJECT RESULTS

- PR1: Policy report: a science and evidence-based report on the situation of low-skilled immigrant adults in the EU.
- PR2: Booklet: an informational booklet with guidelines, tips, and templates on how to facilitate the engagement of the target group in LLL.
- PR3: Teacher Training: an online self-learning program for teachers.
- PR4: Adapt your course: a guide for educational institutions and employers on how to adapt their courses according to the needs of migrant learners.
- PR5: Coaching Tool Box: activities, tools, inspirations, games, etc. that enhance the learning experience and help change the target group's mindset towards LLL.
- PR6: YouTube channel: videos with true stories of low-skilled immigrants who have successfully participated in LLL.
